Si usted está en crisis o necesita ayuda para hacer frente a uno, llame **1-844-493-TALK (8255)** o el texto HABLAR a 38255.

**YOU can help!**

*You CAN notify an appropriate party if you are concerned—it is not illegal or breaking the child’s confidence.*

*It could save their life.*
1. BE AWARE OF RISK FACTORS & WARNING SIGNS
Look for isolating behaviors, perceived burdensomeness, thwarted belongingness, loss of connection to friends or family, talks or writes about a plan, means & intent to die.

2. OPEN THE LINES OF COMMUNICATION WITH THE CHILD
Use developmentally appropriate language to determine urgency/severity:
- Ask the child how they are feeling & if they are safe.
- Say, “Are you thinking of hurting or killing yourself?”
- Ask if they feel like things can get better.

- Express concern about what you are observing in their behavior. Most children will talk, but don’t force it.
- Listen attentively & non-judgmentally. Let the student know they have been heard & they are not alone.

3. IDENTIFY WHAT ACTIONS TO TAKE IF CONCERNED
- Do not leave the student alone.
- Bring the student to the school’s social worker, psychologist or nurse to complete the DPS Suicide Assessment Form & notify the principal.
- Refer to an outside professional for assessment.
